# CPRIT's Mission

In 2007, Texans voted overwhelmingly in favor of a constitutional amendment creating the Cancer Prevention and Research Institute of Texas (CPRIT).

On November 5, 2019, Texas voters approved a constitutional amendment providing an additional \$3 billion to CPRIT, for a total \$6 billion investment in cancer research and prevention efforts across Texas.

CPRIT is now the second largest public source of funding for cancer research in the nation.

Create and expedite innovation in cancer research into prevention and cures

Attract, create, and expand research capabilities

Create high-quality new jobs in Texas

Develop and implement the Texas Cancer Plan

# Cancer's Impact on Texans

Cancer is the leading cause of death for Texans younger than 85 and kills more Texas children and adolescents than any other disease.

148,000 Texans newly diagnosed with cancer in 2024; more than 44,000 will die of the disease this year.

More than 1,800 Texas children under the age of 20 newly diagnosed with cancer in 2024; 220 will die this year.

## Cancer's Economic Costs To Texans

- \$56.3 billion in direct medical costs of cancer and morbidity and mortality losses in 2023
- \$300.1 billion in reduced annual spending
- \$147.9 billion in output losses annually
- 1,252,870 lost jobs from cancer treatments, morbidity & mortality, and associated spillover effects

"An Economic Assessment of the Cost of Cancer in Texas and the Benefits of the Cancer Prevention and Research Institute of Texas (CPRIT) and its Programs: 2023 Update" The Perryman Group

# CPRIT Grant Awards

**1,967 grants - \$3.54 Billion**  
to cancer research and prevention projects across Texas

**Academic Research**  
1,590 awards ▶ \$2.5 Billion

**Product Development Research**  
74 awards ▶ \$694 Million

**Prevention**  
303 awards ▶ \$381 Million

**Combined Research Awards:**  
**1,664 awards ▶ \$3.16 Billion**

Clinical Research (32.2%)	\$1.02 B	Basic Research (12.2%)	\$384.2 M
Translational Research (24%)	\$744.7 M	Research Training (2.8%)	\$ 90.4 M
Recruitment (29.2%)	\$923.4 M

**62**

Companies

# CPRIT Academic Research Program

## Purpose

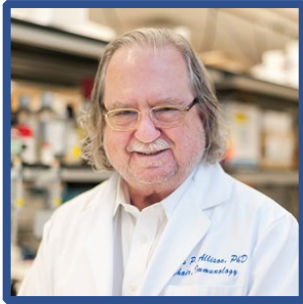

- Discover new information about cancer that can lead to prevention, early detection, and cures
- Translate new and existing discoveries into practical advances in cancer diagnosis and treatment
- Increase the prominence and stature of Texas in the fight against cancer

**1,590 grants - \$2.5 Billion**  
to 36 research entities across Texas

- ▶ 73 CPRIT core facility awards providing access to cutting-edge, shared technology through specialized instrumentation, tumor banks, and technical expertise
- ▶ Eleven NCI Specialized Programs for Research Excellence awards - the most of any state
- ▶ Texas Regional Excellence in Cancer (TREC) grants prioritize development of cancer research outside major hubs of Dallas, Houston, Austin, San Antonio
- ▶ \$3.6 billion in grants and funding garnered by CPRIT grantees after CPRIT awards
- ▶ 192 active commercial agreements with 55 companies

# CPRIT Academic Research CPRIT Scholars

CPRIT Scholar Jim Allison, Ph.D.  
Nobel Laureate 2018

CPRIT catalyzes the state's cancer research efforts by strategically investing alongside Texas universities and cancer research institutes to recruit world-class scientists and their labs to Texas from across the nation and around the world.

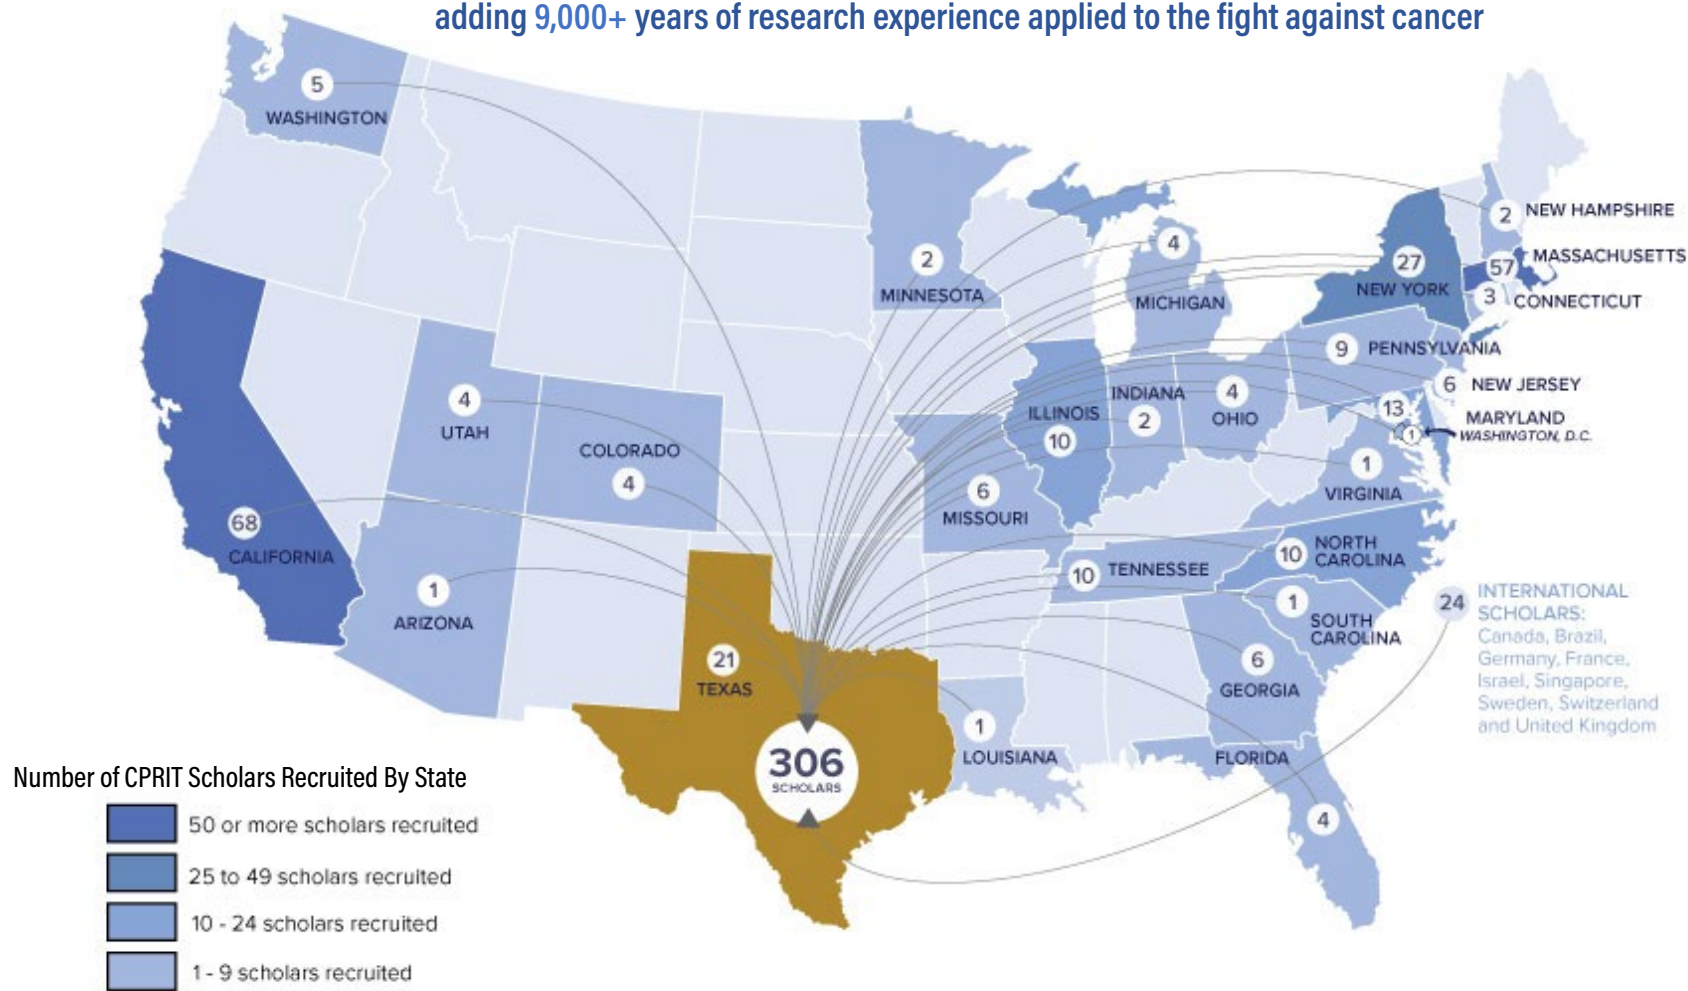

Bringing the best and brightest investigators – at all stages of their careers - to Texas greatly enhances programs of scientific excellence, bolsters Texas’ life science ecosystem, positions our state as a leader in the fight against cancer, and serves as a catalyst for further economic development.

Career Stage	# of Recruits	Total Award \$
<b>First-Time, Tenure-Track</b> <i>Early-career investigators, demonstrated academic excellence and innovation, exceptional potential</i>	212	\$407.8 M
<b>Rising Stars</b> <i>Mid-career investigators with extraordinary accomplishments, scholastic aptitude, leadership</i>	30	\$110.0 M
<b>Established Investigators</b> <i>Senior investigators, proven track records of research accomplishments</i>	61	\$355.8 M
<b>Recruitment of Missing Links</b> <i>Critically important researchers necessary to complete existing, excellent teams (discontinued FY 2013)</i>	3	\$5.9 M
<b>TOTAL</b>	<b>306</b>	<b>\$879.5 M</b>

# CPRIT Academic Research **Attract, Recruit, & Expand**

CPRIT has enhanced Texas' life sciences ecosystem by attracting 306 scholars to the state; adding 9,000+ years of research experience applied to the fight against cancer

# Fighting Childhood Cancer

CPRIT funding has established Texas as a national leader in the fight against childhood and adolescent cancers

12% of CPRIT's portfolio funds childhood cancer projects - proportionately 3x the national rate

## Momentum

Targeting multiple cancer types impacting children

- ▶ **Brain cancer:** \$46+ million dedicated to childhood brain cancer research, spanning bench, translational and product development research. CPRIT-supported new treatments for neuroblastoma are available in clinical trials with promising impact on survival.
- ▶ **Leukemia:** \$340+ million for research for leukemia, the most common childhood cancer
- ▶ **Ewing's Sarcoma:** Over \$20 million for rare bone cancer with limited treatment options
- ▶ **Clinical Trials:** 47 clinical trials with more than 12,000 patients enrolled
- ▶ **Survivorship:** Funding long-term projects designed to prevent reoccurrence of cancer in childhood cancer survivors

## Research & Prevention Goals

- ▶ **Pediatric clinical trials consortium** to increase access to curative immunotherapy, precision therapies, and novel diagnostic capabilities
- ▶ **Statewide informatic and genomic pediatric cancer resources** to enable "Big Data" strategies to understand and cure childhood cancers
- ▶ **Multi-institutional "dream teams"** for childhood brain cancers and pediatric sarcomas
- ▶ **Vaccinate** all Texans ages 9 to 26 against HPV-associated cancers

# CPRIT Product Development Research Program

## Purpose

- To improve patient care through expedited innovation and product development
- To catalyze Texas' emerging life sciences industry and the creation of high-quality new jobs in this state
- To provide a direct return, through intellectual property and revenue sharing, on the investments made by Texans

**74 grants - \$694 Million**

to 62 companies started, expanded, or brought to Texas

- ▶ 18 companies recruited to Texas from other states or countries
- ▶ CPRIT-funded companies have established connections to Texas academic institutions through manufacturing, clinical trials, sponsored research, and licensing
- ▶ More than \$6.7 billion follow-on capital raised by CPRIT companies after receiving award
- ▶ CPRIT companies have conducted 48 clinical trials involving 1,450 patients
- ▶ Five drugs, diagnostics, devices, and services on the market
- ▶ 1,482 employed at CPRIT-funded companies

# CPRIT-Funded Product Development Companies

# CPRIT Prevention Program

## Purpose

- Prevent or reduce the risk of cancer, detect it early, mitigate cancer effects through delivery of evidence-based interventions
- Fund programs and services aimed to help those in most need
- Build capacity to deliver programs by promoting innovations and best practices across Texas

**303 grants - \$381 Million**

To 58 institutions and community organizations

- ▶ 43,000 cancers and cancer precursors detected
- ▶ Delivered over 9.6 million educational and clinical services
- ▶ At least one CPRIT prevention project is available in every Texas county
- ▶ More than 416,000 Texans received their first cancer screenings through CPRIT-funded projects
- ▶ Evidence-based screenings available for breast, colon, lung, and cervical cancers
- ▶ \$27.82 in treatment costs saved with every \$1 spent on cancer prevention

# CPRIT Prevention Projects Across Texas Since 2010

Counties Of Residence Of People Served By CPRIT Prevention

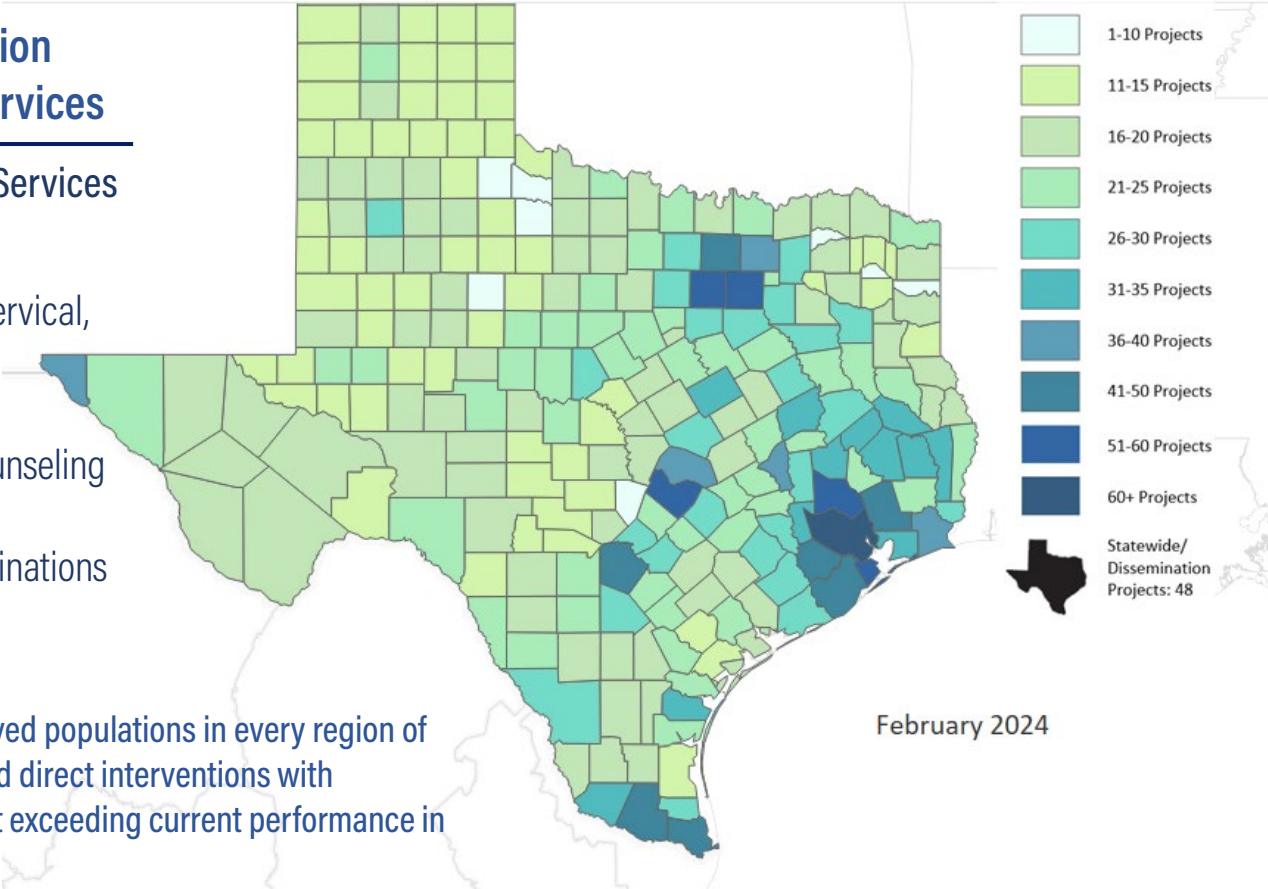

## Delivered Over 9.6 Million Education and Clinical Services

5.87 M Education & Training Services

3.78 M Clinical Services

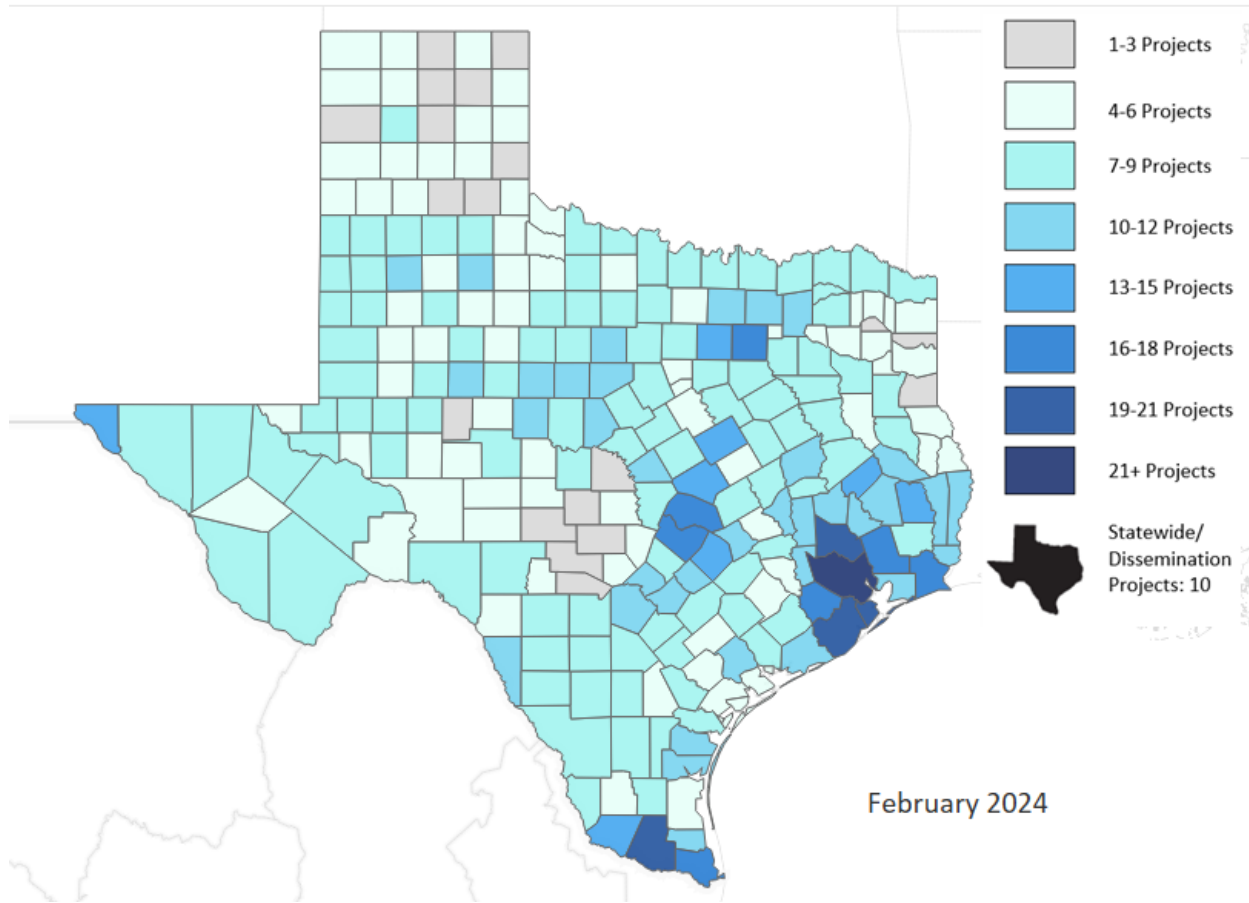

- Screening for breast, cervical, colorectal, lung
- Hepatitis C screening
- Genetic testing and counseling
- Tobacco Cessation
- HPV & Hepatitis B Vaccinations
- Survivor care

These programs reach underserved populations in every region of the state through evidence-based direct interventions with quantifiable public health impact exceeding current performance in the service area.

# 75 Active Prevention Projects

Counties of Residence of Populations Served by CPRIT Prevention Projects  
75 Active Projects

# CPRIT Prevention Program – Screenings and Diagnostics

**1,821,000**

Screenings provided by  
CPRIT prevention projects

**200,000**

Diagnostic tests provided  
by CPRIT projects

**43,000**

Cancers and cancer  
precursors detected

**Screening tests find cancer before a person has any symptoms.**

- The goal is to identify cancer at an early stage when treatment is more effective and less costly.
- Screenings include mammograms, colonoscopies, and Pap smears.
- Some CPRIT prevention projects include genetic tests to look for changes in genes or chromosomes that may be a sign that the person has or is at risk of developing cancer.

**Diagnostic tests confirm or rule out cancer when abnormalities are detected in screenings.**

- Diagnostics provide information on cancer type, stage, and other characteristics.
- Diagnostics include imaging tests (CT scans, MRIs, PET scans), biopsies, endoscopies, and blood tests for tumor markers.

# Prevention Project Spotlight: Cervical Cancer Screening

## Program Director

**Kathleen Schmeler, MD**

University of Texas MD Anderson Cancer Center

**Grant ID:**  
**PP190014**

**Award Date:**  
**February 21, 2019**

**Amount:**  
**\$2,128,529**

**Title:**  
Expansion of cervical cancer prevention services to medically underserved populations through patient outreach, navigation & provider training/telementoring

**Mechanism:**  
Evidence-Based Prevention Programs and Services

In the US, cervical cancer incidence and mortality rates have decreased by 70% due to implementation of screening programs based on Pap and human papillomavirus (HPV) testing. However, women living in medically-underserved areas still experience significant health disparities including a higher burden of cervical cancer. Women living along the Texas-Mexico border and Northeast Texas have some of the highest incidence and mortality rates in Texas. Lack of trained personnel means women in these areas are less likely to receive cervical cancer screening and necessary preventive services.

This project expands another CPRIT-funded project already operating in three sites in the Rio Grande Valley (RGV) to reach eight additional medically-underserved areas in the RGV, Laredo, Northeast Texas, Bastrop and Brazoria counties. The project uses a comprehensive approach to educate the public about cervical cancer screening and HPV vaccination through community outreach and clinic inreach, coupled with patient navigation. Using professional education and training of local providers, the project increased local capacity to deliver evidence-based cervical cancer prevention services to perform colposcopy and LEEP for patients with abnormal screening results. The project also trained patient navigators to perform community outreach and in-reach education and navigate patients and address barriers for care.

## Results

- Educated 87,053 people through in-reach activities and 71,612 at outreach events for a total of 158,665 people educated.
- Navigated/scheduled 3,532 people through in-reach activities and 9,617 through outreach events for a total of 13,149.
- Screened 47,347 women. 1,321 women were diagnosed with CIN 1; 597 with CIN 2/3; 106 with AIS, and 35 with invasive cervical cancer.
- Our collaborating providers performed 2,353 colposcopies and 209 LEEPs.
- We held seven colposcopy training courses with 364 participants (some attended more than one course).
- We held 81 Project ECHO sessions with a total attendance of 3,384 participants. There was an average of 46 participants per session and a total of 147 individual cases were presented.

THE UNIVERSITY OF TEXAS  
**MD Anderson  
Cancer Center**

Making Cancer History®

## Impact

- ✓ Continued operations of this project during the COVID-19 pandemic through transition to virtual formats with an increase in partner participation at virtual mentoring sessions during the pandemic and this increase was sustained until the end of this grant.
- ✓ Trained navigators to increase their knowledge in reaching more women in the community to increase screening numbers.
- ✓ Expanded and transitioned monthly navigation education sessions to ECHO sessions and launched a Patient & Navigation Education (PEN) ECHO for navigators across the state of Texas.
- ✓ Published a number of manuscripts about the project and the importance of multicomponent interventions to address patient and system related barriers to cervical cancer screening and follow up.

# Prevention Project Spotlight: Breast Cancer Screening

## Program Director

Rakhshanda Layeequr Rahman, MD  
Texas Tech University Health Sciences Ctr

**Grant ID:**  
PP190021

**Award Date:**  
February 21, 2019

**Amount:**  
\$2,430,998

**Title:**  
Access to Breast and Cervical Care for  
West Texas (ABC24WT)

**Mechanism:**  
Evidence-Based Prevention Programs  
and Services

The human and economic impact of breast and cervical cancer in West Texas is stark. Women living in COG-7, a high-risk area, have higher than average breast cancer incidence and mortality rates, as well as cervical cancer mortality rates. Women in COG-2 also experience elevated incidence and mortality rates for cervical cancer. Socioeconomic, educational, cultural, and geographical challenges in these largely Hispanic regions limit access to healthcare. Reducing the number of advanced breast and cervical cancers in women lowers the economic burden on the state posed by treatment costs for advanced diseases in uninsured/underinsured populations. Since early disease is curable, these women are likely to remain productive members of society.

ABC24WT reaches out to women and their families living in COG-2 and 7 via an educational and awareness campaign based on evidence-based approaches including "Train the Trainer," culturally sensitive educational materials, community activists, and the "precede-proceed" models. County focused events will target women 40 years and older for screening mammograms, 21-65 years old for screening Pap smears, and individuals 9-26 years for HPV shots. Outreach and resource identification will be available to all income levels, but ethnic minorities and rural communities will be the primary focus. The project provides "no cost" services to uninsured/underinsured population who do not qualify for other indigent care funds. Although the aim of ABC24WT project is to reduce breast and cervical cancer, the community collaboration also strengthened relationships for other projects important to local communities.

TEXAS TECH UNIVERSITY  
HEALTH SCIENCES CENTER™

## Results

- Increase in screening in each COG for both breast and cervical cancer screens
- Provided >600 breast cancer screenings
- Achieved the >99% follow up rate for patients with an abnormal cervical cancer screening and/or abnormal breast cancer screening
- Navigated 100% of patients with an abnormal Pap test or abnormal mammogram to diagnostic follow-up
- Educated >100,000 people indirectly and >4,000 people directly about cancer screening guidelines

## Impact

- ✓ Successfully integrated patient education on both appropriate breast cancer screening guidelines and cervical cancer screening guidelines into patient visits
- ✓ Educated patient navigators on sociodemographic barriers to health to aid in the optimization of patient care
- ✓ Implemented a linguistically-and culturally-diverse approach to patient outreach efforts and the coordination of patient care
- ✓ Used innovative strategies to increase breast and cervical cancer screening rates in COGs 1,2 and 7

# Prevention Project Spotlight: Hepatocellular Carcinoma

**Program Director**  
**Roberto Villarreal, M.D., MPH**  
University Health System

**Grant ID:**  
**PP170042**

**Award Date:**  
**February 15, 2017**

**Amount:**  
**\$1,238,838**

**Title:**  
University Health System Hepatitis Viral  
Infection and Systematic Treatment  
Program (HepVISTA)

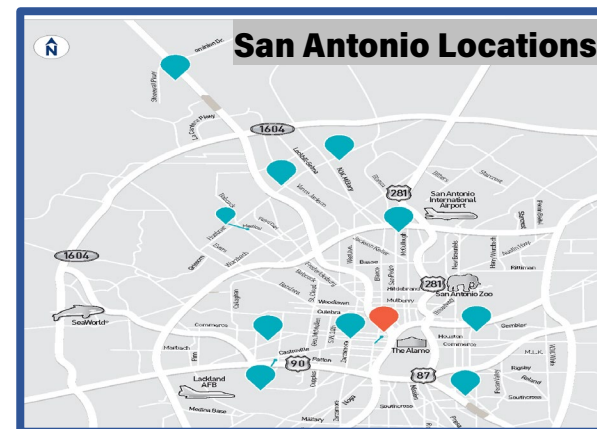

**Mechanism:**  
Evidence-Based Prevention Programs  
and Services

South Texas has the highest incidence of Hepatocellular Carcinoma (HCC) in the U.S., about 5% higher than the rest of the country. The Hepatitis C virus (HCV) is the major risk for HCC. Although most HCV positive patients are baby boomers (born 1945-1965), this age group has a low HCV screening rate.

The Hepatitis Viral Infection and Systematic Treatment Alliance (HepVISTA) Program, implemented at the University Health primary care clinics, prevents HCC in adults at risk through Hepatitis B virus (HBV) and HCV screening; outreach/awareness on the importance of HCV testing; comprehensive patient and provider education; vaccination uptake for HBV; and navigation to treatment services.

## Results

- Reached 231,000 individuals to increase HCV awareness.
- Educated 714 clinical providers/staff on HCV testing and 1,311 patients educated on HCV education.
- HCV screening rate increased from 15% to 19% from program year 1 to year 4 (2017-2020).
- Screened 43,596 patients for HCV Antibody.
- 90% primary care providers reported a more streamlined process from screening to treatment due to the new functionality of the Electronic Health Record.
- 839 patients were linked to treatment services; patients rated their satisfaction with navigation services 4.9 out of 5.
- Patient knowledge on HCV significantly increased and patients reported a greater ability to control condition largely due to navigation efforts.
- Administered 1,273 HBV vaccines.

## Impact

- ✓ The HepVISTA program increases the overall life expectancy of the population cohort (baby boomers) by ~ 0.36 years
- ✓ System Change - sustainable routine HCV/HBV reflex testing at 11 primary care clinics across Bexar County
- ✓ Patient Navigators are instrumental to patient retention in care by serving as a continuous point of contact within a health system

# Prevention Project Spotlight: Lung Cancer Screening

Baylor  
College of  
Medicine

**Program Director**  
Roger Zoorob, MD, MPH, FAAFP  
Baylor College of Medicine

**Grant ID:**  
PP180016

**Award Date:**  
August 21, 2018

**Amount:**  
\$1,472,918

**Title:**  
Equitable Access to Lung Cancer  
Screening and Smoking Cessation  
Treatment: A Comprehensive Primary  
Care and Community Health Approach

**Mechanism:**  
Evidence-Based Prevention Programs  
and Services

There is critical need for evidence-based prevention initiatives for lung cancer among predominantly underserved populations within Harris County. Lung cancer is the top cause of US cancer mortality, accounting for 1 in 4 cancer deaths, and in 2015, Harris County had more lung cancer-related deaths at ages over 35 years than any other county in Texas. Because symptoms of these lung cancer cases are mistaken for other problems or don't appear until the disease is advanced and perhaps incurable, diagnosis is often delayed with a resultant decrease in survival longevity.

The project developed and implemented a comprehensive primary care and community health program for efficient and equitable delivery of lung cancer screening and smoking cessation treatment for high-risk underserved Harris County residents. Our multi-level strategy included a critical mass of 246 providers educated and trained in lung cancer screening and smoking cessation training, a detailed lung cancer screening program implementation guide with feedback from administrators and providers of multiple disciplines, and in 15 community health centers, operationalization and coordination of services through process flow maps, and clinic-specific plans for integration. The program also provided integrative navigation, pharmacotherapy, and behavioral therapy services.

## Results

- 14,502 patient charts manually reviewed and updated through navigation services to determine eligibility for lung cancer screening and/or TC services
- 223 primary care providers training on lung cancer identification, screening, and treatment of high-risk patients for lung cancer
- 359 completed low dose CT screening exams
- Over 90% of the participants have never been screened for lung cancer
- Three participants were diagnosed with adenocarcinoma
- 246 primary care providers trained on smoking cessation practices, local services, and referral protocols
- Quit rate of 28.2% with 78.6% of the remaining participants showed a reduction in tobacco use

## Impact

The program functioned as a pilot for the system that approved the lung cancer screening as a service on the schedule of benefits. The program's success served as a model for expansion into rural locations for the expansion renewal project PP210044.

"I never would've thought in a million years, that I would quit. I'm thankful for the help...and the encouragement...our [counseling] talks helped me a lot." "I started smoking at 12. I've tried to quit before, many times---believe me. I was scared because a couple friends died of it [lung cancer]. After this program, I decided that enough was enough. I set a quit date and agreed to the help." - Program participant

# Prevention Project Spotlight: Colorectal Cancer Screening

**Primary Investigator**  
**Jason McKnight, M.D.**

Texas A&M Health Science Center

**Grant ID:**  
**PP180037**

**Award Date:**  
**February 21, 2018**

**Amount:**  
**\$1,499,202**

**Title:**  
Advancing an Established Colorectal  
Cancer Prevention Program for Rural  
and Underserved Texans

**Mechanism:**  
Evidence-Based Prevention Programs  
and Services

Colorectal cancer (CRC) is a significant public health problem in Texas, especially in areas with rural and uninsured populations. Although CRC the second leading cause of cancer-related death in the state, Texas ranks near the bottom (47th) among states in CRC screening; screening rates are particularly low among the uninsured.

More people are diagnosed and die from CRC in rural areas compared to urban areas. CRC incidence and mortality also reflect racial disparities. In Texas, Hispanics are less likely to have CRC screening compared to non-Hispanics. Black men are more likely to be diagnosed and die from CRC than White men.

The project, under the direction of Dr. McKnight, provides CRC prevention education, screening services, and patient navigation across the continuum of care, to residents of 21 Texas counties, including 15 rural counties.

## Results

- **Colorectal Cancer Screenings** - Provided 800 colonoscopies and disseminated nearly 1,300 fecal immunochemical tests (FIT) across 21 counties, including the Greater Brazos Valley and several counties inland of the Coastal Bend.
- **People Educated/Navigated** - 7,300+ people served directly (face-to-face) with education and/or navigation.
- **People Reached** - More than 57,700 people reached indirectly with colorectal cancer prevention education.
- **Training** - Sixty-one family medicine resident physicians received hands-on clinical colonoscopy experience.

## Impact

- Increased access to colorectal cancer screening through use of a culturally appropriate community health worker model.
- Improved availability of affordable screening for rural and medically underserved populations through a family medicine residency training program.
- CPRIT awarded Texas A&M Health Science Center and Dr. McKnight a \$2.5 million grant in 2022 (PP220013) to expand this successful program to add more East Texas counties, increase CRC screening, assess for liver cancer risk factors and provide Hepatitis-C testing.

**TEXAS C-STEP**  
Cancer Screening, Training, Education & Prevention

# CPRIT Prevention Research

## **\$124 million in 80+ projects**

CPRIT also strategically funds research projects in areas of early detection and prevention. These prevention projects can include childhood cancer survivorship, and intractable cancers with a major emphasis on cancers of significance to Texans.

### **Prevention Research Project Examples Include:**

- ▶ **Texas CONNECT for Cancer Prevention Study (CPRIT Grant: RP23042)**
- ▶ **Collaborative Action Program (CAP) to reduce liver cancer mortality in Texas (CPRIT Grant: RP190641)**
- ▶ **Developing a blood test to predict an individual's risk of dying from lung cancer (CPRIT Grant: RP180505)**
- ▶ **Projects CLEAR and ADHERE for smoking cessation and lung cancer screening (CPRIT Grant: RP190210 and RP230312)**
- ▶ **Imaging approach using nonlinear optical microscopy to detect head and neck cancers (CPRIT Grant: RP150449)**
- ▶ **Technology for tissue testing using an automated digital pathology lab imaging system (CPRIT Grant: DP19018)**

## Screening Research Funding

Grant ID	Title	Primary Investigator	Organization	Cancer Types	Award Amount1
RP230213	Multi-component Interventions to Improve Uptake and Adherence to Lung Cancer Screening	Volk, Robert J	The University of Texas M.D. Anderson Cancer Center	Lung and Bronchus	\$ 1,988,211.00
RP220137	Implementation of Cancer Screening in Children and Adolescents Genetically at High Risk of Cancer	Tomlinson, G. E.	The University of Texas Health Science Center at San Antonio	All Sites	\$ 1,954,748.00
RP170747	Noninvasive Lung Cancer Screening by Rapid Chemical Profiling of Exhaled Breath	Sun, Yuze	The University of Texas at Arlington	Lung and Bronchus	\$ 199,999.00
RP160834	Integrated-cavity-enhanced pre-screening for lung cancer	Yakovlev, Vladislav	Texas A&M University	Lung and Bronchus	\$ 200,000.00
RP160030	A Randomized Controlled Trial (RCT) of Patient Navigation for Lung Cancer Screening in an Urban Safety-Net System	Gerber, David E	The University of Texas Southwestern Medical Center	Lung and Bronchus	\$ 1,492,616.00
RP140020-P1	P1:Evaluation of Cancer Screening Practices	Goodwin, James	The University of Texas Medical Branch at Galveston		\$ 337,836.00
RP130051	Impact of Health Insurance on Racial Disparities in Cancer Screening, Diagnosis, Treatment and Survival in Texas	Du, Xianglin L	The University of Texas Health Science Center at Houston	Breast, Colorectal	\$ 435,049.00
RP101207-P1	Evaluation of Cancer Screening Practices [CERCIT: Comparative Effectiveness Research on Cancer in Texas]	Goodwin, James	The University of Texas Medical Branch at Galveston		\$ 508,517.00
RP240208	Unidos contra el VPH: Screening accuracy, preference, and uptake of HPV self-sampling among Latinxs along the US-Mexico border	Calderon-Mora, Jessica	The University of Texas at Austin	Cervix Uteri	\$ 1,920,007.00
DP150052	High-throughput Flow-proteomic System in Screening Functional Complexes as Cancer Biomarkers	Hung, Mien-Chie	The University of Texas M.D. Anderson Cancer Center	Lung and Bronchus	\$ 1,359,649.00

## Imaging Research Funding

Grant ID	Title	Primary Investigator	Organization	Cancer Types	Award Amount1
RP240289	Real-time, label-free, micro HSI device and transformer-based attention networks for oral cancer imaging	Fei, Baowei	The University of Texas at Dallas	All Sites	\$ 1,049,806.00
RP200233	Advance CT And Fluorescence Imaging Of Kidney Cancers With Glutathione-mediated Contrast Enhancements	Zheng, Jie	The University of Texas at Dallas	Kidney and Renal Pelvis	\$ 900,000.00
RP200223	High-Sensitivity 19F MRI for Clinically Translatable Imaging of Adoptive NK Cell Brain Tumor Therapy	Sokolov, Konstantin	The University of Texas M.D. Anderson Cancer Center	Brain and Other Nervous System	\$ 887,713.00
RP190400	Utilization of Imaging and Serum Biomarkers to Predict the Development of Cardiac Dysfunction in Childhood Cancer Survivors	Noel, Cory V	Baylor College of Medicine	Leukemia, Lymphoma, Sarcoma	1,192,412.00
RP180716	Noninvasive Diagnostic Imaging of Brain Cancer Using Hyperpolarized 13C-Labeled L-Tryptophan and L-Methionine	Lumata, Lloyd	The University of Texas at Dallas	Brain and Other Nervous System	\$ 200,000.00

RP180381	Mass Spectrometry Imaging to Uncover Predictive Metabolic Markers of Ovarian Cancer Surgical Outcome and Treatment Response	Schiavinato Eberlin, Livia	Baylor College of Medicine	Ovary	\$ 240,190.27
RP180031	Imaging of biochemical alterations in human breast malignancy using CEST-MRI	Vinogradov, Elena	The University of Texas Southwestern Medical Center	Breast	\$ 900,000.00
RP170628	The University of Texas M.D. Anderson Cancer Center Science Park Flow Cytometry and Cell Imaging Core	Richie, Ellen	The University of Texas M.D. Anderson Cancer Center	All Sites	\$ 3,693,219.00
RP170564	Super-resolution imaging of tumor angiogenesis in deep tissue with high specificity and sensitivity	Yuan, Baohong	The University of Texas at Arlington	Breast, Colorectal, Head and N	\$ 900,000.00
RP170314	Biodegradable nanoclusters for molecular cancer imaging	Sokolov, Konstantin	The University of Texas M.D. Anderson Cancer Center	Ovary	\$ 899,553.00
RP160847	A Body Coil for MR Imaging and Spectroscopy of Cancer at 7 Tesla	Wright, Steven M	Texas A&M Engineering Experiment Station	Breast, Gallbladder, Kidney and	\$ 200,000.00
RP160617	Optimizing therapeutic strategies against lung cancer using Multi-Modality Imaging	Zhang, Li	The University of Texas at Dallas	Lung and Bronchus	\$ 899,999.00
RP160460	High resolution imaging for early and better detection of bladder cancer	Richards-Kortum, Rebecca R	Rice University	Bladder	\$ 873,765.00
RP150701	Non-invasive Colonoscopy by Molecular Imaging of Mucin Targeted Hyperpolarized Silicon Nanoparticles	Carson, Daniel D	Rice University	Colorectal	\$ 200,000.00
RP150456	TAMU-UT Southwestern Partnership for Breast Imaging and Spectroscopy at 7 Tesla	Malloy, Craig	The University of Texas Southwestern Medical Center	Breast	\$ 897,311.00
RP150449	Noninvasive multiscale imaging for optical biopsy in epithelial cancers	Vargas, Gracie	The University of Texas Medical Branch at Galveston	Head and Neck	\$ 852,748.00
RP140021-P4	P4:High Field MRS and CEST Imaging of Brain Tumors: Biomarkers of Therapeutic Response	Choi, Changho	The University of Texas Southwestern Medical Center		\$ 528,558.00
RP140021-P3	P3:Metabolic Imaging of Hyperpolarized 13C Substrates in Animal Models of Cancer	DeBerardinis, Ralph J	The University of Texas Southwestern Medical Center		\$ 425,338.00
RP130604	Imaging cancer with radiofluorinated organoboron/biomolecule conjugates	Gabbai, Francois	Texas A&M University	All Sites	\$ 199,997.00
RP130362	Imaging cancerous tissues with liposomal MRI contrast agents that utilize bioengineered nanovalves	Blount, Paul	The University of Texas Southwestern Medical Center	All Sites	\$ 1,247,260.00
RP120941	NIR fluorescence imaging for assessment of lymphatics in cancer treatment and recovery	Sevick, Eva M	The University of Texas Health Science Center at Houston	Head and Neck	\$ 605,425.00
RP120617	Advanced in vivo imaging of tumor initiation and progression	Gustafsson, Jan-Ake	University of Houston	All Sites	\$ 990,286.00
RP120558	Development of a Novel High-resolution Photoacoustic Microscopy System for Noninvasive in vivo Imaging of Melanoma	Ye, Jing Yong	The University of Texas at San Antonio	Skin	\$ 698,120.00
RP120052	Super-high resolution imaging of tumor angiogenesis in deep tissue	Yuan, Baohong	The University of Texas at Arlington	Breast, Head and Neck, Prosta	\$ 1,095,905.00
RP110441-C1	C1: In vivo Imaging Core	Mason, Ralph P	The University of Texas Southwestern Medical Center		\$ 859,684.00
RP110262	Rationally designed magnetic nanoconstructs for the imaging and hyperthermia of tumor cells and neovasculature	Decuzzi, Paolo	The Methodist Hospital Research Institute	Brain and Other Nervous Syste	\$ 1,499,996.00
RP100625	TAMU-UT Southwestern Partnership for Cancer Imaging and Spectroscopy at 7 Tesla	Malloy, Craig	The University of Texas Southwestern Medical Center	Basic Science, Brain and Other	\$ 1,173,255.00
RP100146	Imaging cancerous tissues with liposomal MRI contrast agents that utilize bioengineered nanovalves	Blount, Paul	The University of Texas Southwestern Medical Center	Multiple Sites	\$ 1,144,531.00
RP100932	Multi-Modal Optical Imaging Systems for Early Detection of Oral Cancer	Richards-Kortum, Rebecca R	Rice University	Head and Neck, Oral Cavity and Pharynx	\$ 1,834,699.00

Survivorship Research Funding					
Grant ID	Title	Primary Investigator	Organization	Cancer Types	Award Amount1
RP240143	Leveraging Passport for Care in a telehealth framework to improve equitable access to survivorship services	Gramatges, Maria	Baylor College of Medicine	Childhood and Adolescent	\$ 1,399,382.00
RP220532	POSTCare-O: Survivorship Care for Women Living with Ovarian Cancer	Kvale, Elizabeth	The University of Texas at Austin	Ovary	\$ 1,016,168.00

Product Development Research - Imaging, Early Detection Funding					
Grant ID	Title	Primary Investigator	Company	Cancer Types	Award Amount1
DP200046	Integrated interior magnetic resonance imaging and medical linear accelerator system for radiation therapy	Choudhury, Farhad	Texas Magnetic Imaging Technology, Inc.	All Sites	\$2,997,384.00
DP190018	Rapid pathology evaluation system for biopsies	Wang, Mei	Instapath Inc.	Liver, Lung, Kidney, Breast, Prostate, Head and Neck, GI, Gynecologic	\$3,000,000.00
DP190087	OTIS (optical tissue imaging system) Impact on Final Positive Margin Rates in Breast Conserving Surgery	Berkeley, Andrew	Perimeter Medical Imaging Corp.	Breast, colorectal, head and neck	\$7,446,844.00
CP120017	Clinically Actionable Mutation Profiling for Cancer Personalized Medicine using Scalable, Ultra-deep Next Generation Sequencing	Latham, Gary	Asuragen, Inc.	All Sites	\$6,837,265.00
